Ethical Enterprise Builders are The Sum of Our Choices

Every choice we make, large or small, reflects our values and ethics, making us the sum of our choices. This applies to the food we eat, the work we do, the relationships we hold. Choices Cafe, a locally-grown organic vegan restaurant was founded on these principles and supports choices which reduce suffering for people, animals, and the planet. Alex and Lori speak on their separate plant-based journeys, their shared dream of raising consciousness, overcoming obstacles and plans for business growth - all contributions to save the world!

Alex Cuevas - Choices Café Founder & CEO; 28 year vegan; Yale graduate (Computer Science); 15 years' experience in systems management, processes and executive leadership, leads the charge in bridging guidance & technology into the Choices family of restaurants to deliver on high quality plant-based organic food.

Lori Zito - Choices Café President; 7 year vegan based on love for animals; certified in plant based nutrition (eCornell), holistic health coach (Institute of Integrative Nutrition), yoga instructor; Lori left her career as a physical therapist in NYC two years ago to become part of Choices Cafe and its mission
